Subject index

Ab-initio 255
Adiabatic energy surface 417
Asymptotic behavior 355
Atomic polarizabilities of Ge, As, Se, and Br 45

Basis set polarization approach 45
Be(^3P) 417
Benzenoid hydrocarbons 269
Benzenoids 125
BeO 223
Beryllium ion 157
Beryllium water complex 157
Bond alternation 105
Bond energy calculations 65
Breit interaction 405
BSSE 281

CAS SCF 417
$[(CF_3)_2PN]_2NVCl_2$ 245
Charge transfer 157
CNDO calculations 95
Configuration interaction 365
Copper 375
Core-polarization effects 339
Core polarization effects for the third-row elements 45
Correspondence rules 329
Coulson's integral method 105
Counterpoise correction 281
CrN 365
CrO 365
Cross sections of molecular surfaces 79

Density reorganization 21
Diabatic states 157
Dications 303
Dimensional scaling 1
Dipole moment 223
Dipole moments and polarizabilities of the fourth-row atom hydrides (SnH_4, SbH_3, H_2Te, HI) 339
Dipole moments and polarizabilities of the third-row atom hydrides 45
Dipole polarizabilities of Sn, Sb, Te, and I 339

Dissociation energy 223
d-orbitals 391

Electron correlation 319
Electron density 21
Eigth moment 237
Electron structure 95
Electronic spectra 201
Energy surfaces 31
Enumeration 125
Excitation localization 31
Excited electronic states 375

FeN 365
First-order density matrix 319
Five-vertex graphs 185
Flat molecular aggregates 31

Gradient corrections 65
Graph theory 237
Graphical invariants 237
Group IVA elements 185

$H_2(^1\Sigma_g^+)$ 417
Hartree–Fock–Dirac method 405
Hartree–Fock orbital 355
Hartree–Fock–Slater exchange 65
HOMO 355
Homonuclear diatomics 21
Hydrogen bonding 255
Hyperfine coupling constants 291

INDO method for lanthanides 201
Infrared spectra 255
Isomer enumeration 269
Isomers 125

Lanthanide monoxides 201
Ligands 303

Many-body problem 1
Marginal density 21
Mass-velocity effects 139

Migration cf excitation 31
MNDO 391
Molecular electric properties 45, 339
Molecular orbital 355
Molecular shape 79
Molecular similarity 319

Periodic table 269
Phase-space dynamics 329
π-Electronic structure 105
Polarized basis sets 45, 339
Polycyclic aromatics 105
Polyradicals 125
Potential energy curves 223
Proton transfer 303

Quantum theory 1, 329

Radical cation 291
Relativistic *ab initio* calculations 405
Relativistic bond lengthening 139
Relativistic effects for the third-row elements 45
Relativistic effects on electric properties 339
Relativistic wavefunctions 375
Roughness measures 79
Roughness spectrum 79

SAC-CI 291
SCF method 245
Schrödinger equation 1, 329
Shape descriptors 79
Spin-orbit interaction 201
Spin polarization effect 291
Symmetry 125

Tetrahedral hydrides 405

Uranium compounds 139

Valency 95

Water dimer 303
Wave function 355
Weak H-bonded complex 281
